The Compact Range, designed for all kitchens

EuroCave, inventor of the wine cabinet, has been creating products for storing and serving wine by the glass for over 40 years. The brand, positioned in the high-end segment, secures its presence in the domestic market by continually developing new products.

The Compact Range, which incorporates all of EuroCave's expertise in terms of storing and protecting wine, focuses on the kitchen. A flush-fitting range which meets space-saving requirements whilst promoting the French lifestyle, synonymous with elegance and excellence.

2 sizes: Small or large models to store 38 - 167 bottles.

2 uses: Wine serving or storage cabinet, according to your requirements.

5 types of door: Solid, glass, glass with silver frame, Full Glass and a technical door which can be matched to your other kitchen units, for a harmonious appearance.

Cabinets in this range all benefit from EuroCave's technology, to protect your wines and ensure they are stored in optimal conditions:

- Temperature controlled to the nearest degree.
- Humidity management.
- Bottles constantly monitored: alarms to ensure peace of mind.
- High quality manufacturing and finishes that will stand the test of time.
- Sliding shelves fitted with the Main du Sommelier support: a structure in two materials to absorb vibration and protect your bottles.

To meet everybody's requirements, the Compact Range's internal equipment is completely flexible. Display, storage, serving – store your wine according to your preference!
